Formulation to distribution 7. Then, the future of healthcare debate can move beyond partisan discussion over healthcare access and cost, to a discussion of the diseases that biological medicines can successfully conquer. There is a significant market for biologic drugs that demonstrate a high similarity to an already approved drug biosimilars. Some are economic and focus on legal concerns such as patents and data exclusivity. The advanced technology and resources needed to produce biologics create high-entry barriers for small biotechnological companies. The market will experience growth due to several reasons. See the ocean every day and breathe. Our biologic medicines are manufactured using living cells engineered to produce. The biopharmaceutical market is seeing a rapidly growing class of therapeutics showing significant potential in new treatments in oncology, diabetes, and other disease areas. They will have been evaluated and approved by a regulatory authority on the basis of analytical and clinical comparison to the already marketed product.
