Abstract Since the industrialization and urbanization of the Western world

It is easy to imagine misinterpretation of these carefully crafted words, particularly by the target population of the tanning industry: young adults and adolescents. In both these studies, some participants received materials that emphasized the attractiveness of tanned skin, while others were exposed to materials that stressed the appearance advantages of pale skin. Asgari adds.

Greater use of tanning beds by friends and acquaintances was correlated with prevalence also does not provide an indication of the recency of indoor tanning. History and Culture of Tanning in the United States.
