## **FS Red Leaves in the Vineyard: Biotic and Abiotic Causes (Rutgers NJAES)**

While the fall foliage in North America and East Asia takes on a fiery red hue, perplexingly, autumn leaves in Europe are mostly yellow in color.

### **Red leaves brighten autumn landscape in Hubei - udylyhubytig.tk**

In Europe these autumn leaves are mostly yellow, while the United States and East Asia boast lustrous red foliage. But why is it that there are.

Phosphorous P deficient leaves show interveinal reddening while white varieties show chlorosis. Young leaves of many plants are transiently red because of the accumulation of anthocyanins, with the redness disappearing as leaves mature. This bush can grow to 10 feet tall at maturity. It is a toss-up as to which offers a better autumn display, although Boston ivy is the better known of the two. When the green chlorophyll in Red Leaves diminishes, the yellow pigments that already exist become dominant and give their color to the leaves.
