Some of the higher potential mixed systems in Africa and Asia are already facing resource pressures, but there are various responses possible, including efficiency gains and intensification options Herrero et al. When tested in steers, no reduction in performance was recorded when the implants were withdrawn 32 and 39 days before slaughter. Increasing competition for land in the future will also come from biofuels, c  
Forgot your username? Meyer, K.  
For the developed world, various drivers will shape the future of livestock r  
intensification in production is likely to occur in the humid-subhumid zones on the most suitable land, where this is feasible, through the use of improved pastures and effective management.
